

Patient Vaccination and Well Child Visit Agreement

At The Pediatric Place, we believe in the effectiveness of vaccines to prevent serious illness and to save lives. We also believe in the safety of our vaccines. Because of this, we believe that all children and young adults should receive all the recommended vaccines according to the schedule published by the Centers for Disease Control and the American Academy of Pediatrics.

With that being said, we will only accept patients that follow the required vaccine schedule noted below. Should you choose to follow an alternate schedule that deviates from the below schedule, we will not be able to accept you as a patient and/or you will be dismissed from the clinic.

Please initial stating you agree with these terms listed. _____ Date _____
